

RICHMOND CONSTANCE

Dasmarinas, Cavite | +639150365602 | r.constante.dev@gmail.com

WORK EXPERIENCE

Freelancer | Full Stack Software Engineer

Dec 2024 – Present

- Delivered multiple full-stack web and mobile applications for clients, building scalable frontend systems with React/Flutter and backend APIs using Node.js and Python, improving development turnaround and client deployment efficiency
- Architected and optimized PostgreSQL/MySQL databases and REST APIs with authentication, real-time features, and third-party integrations, enabling stable multi-user SaaS and CRM operations across projects
- Developed and deployed cross-platform mobile and SaaS solutions end-to-end, integrating AI features, real-time communication, and cloud deployment pipelines to improve application performance and usability

Cawil.AI | Full Stack Software Engineer Intern

Jun 2025 – Aug 2025

- Led development of AI-powered web and mobile applications, designing scalable frontend/backend architectures that accelerated feature delivery within tight startup timelines
- Built and integrated RAG-based AI systems and machine learning pipelines, enabling intelligent data retrieval and computer vision capabilities for production-ready applications
- Designed scalable APIs and backend infrastructure for AI-driven platforms, improving system reliability and supporting real-time data processing across multiple services

PROJECTS

Tagbase.co | React.js, Tailwind CSS, Node.js, PostgreSQL, OpenAI, HubSpot API

- Developed a full-stack SaaS platform and HubSpot Marketplace application that enabled tag-based CRM organization, improving workflow management and customer data accessibility
- Built scalable APIs and optimized frontend performance for real-time CRM interactions, enabling responsive multi-user operations within HubSpot environments
- Integrated AI-powered data processing and automation features using OpenAI and HubSpot APIs, streamlining CRM workflows and improving operational efficiency

Vbase.io | React.js, React Native, Node.js, PostgreSQL, Tailwind CSS, HubSpot API, Google Maps API, OpenAI

- Developed a full-stack SaaS platform across web and mobile integrating CRM systems, geolocation services, and communication tools such as Gmail and Outlook
- Implemented AI-driven features including text-to-speech and intelligent data processing with scalable backend architecture for real-time multi-user operations

Smart Classroom | Python, Flask, Computer Vision, Machine Learning, HTML, CSS, JavaScript

- Developed an AI-powered smart classroom system for De La Salle University – Dasmarinas integrating IoT devices and machine learning models for real-time classroom monitoring
- Built computer vision and backend processing pipelines that analyzed live data streams and generated actionable insights for automated classroom management and analytics

EDUCATION

De La Salle University – Dasmarinas

July 2022 - August 2026

Bachelor of Science in Computer Science

Relevant Coursework: Machine Learning, Software Engineering; Operating Systems; Algorithms; Artificial Intelligence

SKILLS

Languages: Python, JavaScript, Java, Kotlin, PHP, HTML, CSS, Swift

Frameworks: React.js, React Native, Tailwind CSS, Flask, TensorFlow, PyTorch, Flutter

Database: PostgreSQL, MySQL, SQLite, MongoDB, Firebase, Supabase, Neon, Convex

Cloud & Platforms: Amazon Web Services, Cloudflare, Microsoft Azure, Google Cloud Platform

Tools: REST APIs, Git, GitHub, HubSpot API, Vercel, Netlify
